Introduction

This [VS Code](#) extension adds support for effectively editing, refactoring, running, and reloading [Flutter](#) mobile apps. It depends on (and will automatically install) the [Dart extension](#) for support for the [Dart](#) programming language.

Note: Projects should be run using **F5** or the **Debug** menu for full debugging functionality. Running from the built-in terminal will not provide all features.

Installation

[Install from the Visual Studio Code Marketplace](#) or by searching within [VS Code](#). The Dart extension will be installed automatically, if not already installed.

Documentation

Please see the [Flutter documentation for using VS Code](#).
